Esta é a nossa casa. É aqui que encontramos a força revitalizadora da água e o poder regenerador dos elementos. Aqui encontramos o calor da terra e a energia dos seus ventos transformadores.

Este é o nosso mundo. Fonte de Inspiração de artistas e visionários. De criadores e fazedores. De pessoas que acreditam que o melhor ainda está para vir e, por isso, também dão o seu melhor.

O resultado: objetos de rara beleza e simplicidade. O equilíbrio entre a natureza e a natureza do homem. Uma orquestra de formas, cores e texturas. Jardim de emoções e sensações.

A vida na sua expressão mais íntima.

INOVAÇÃO NA VALADARES

A Inovação constitui hoje um dos principais argumentos de diferenciação das organizações e de afirmação de marcas no mercado global. A ARCH, empresa que hoje tem a responsabilidade de produzir e comercializar a marca Valadares, apresenta já muitos argumentos que sustentam uma visão do futuro para os seus artigos, concretizados pelo Design, Funcionalidade e Desempenho dos artigos Cerâmicos que produz.

A Cerâmica é um dos melhores materiais criados pelo homem e um dos que tem maior campo de aplicações em diferentes domínios. A sua produção é delicada e exigente e sempre suportada em elevado conhecimento técnico de matérias-primas e processos de transformação.

O Sanitário é, entre os ramos da Cerâmica, o que solicita maior conhecimento em Cerâmica, pois a dimensão dos artigos e segurança de utilização exigem um domínio perfeito das melhores técnicas a quem se atreve a industrializar este desafiante processo. Assim se percebe o baixíssimo número de produtores de Sanitário em todo o mundo e menos ainda a quem concebe o seu produto.

Os 95 anos de trabalho em Cerâmica da marca Valadares, constituem a razão do domínio dos processos Cerâmicos de que hoje a ARCH é detentora. Esse capital de conhecimento permite já a concepção integral das suas peças, entre o Design e a concepção do seu equipamento industrial. A este argumento acrescenta a condição excepcional de se diferenciar pelos materiais cerâmicos com que fabrica os artigos Sanitários com durabilidade atestada por 20 anos de garantia técnica.

INNOVATION AT VALADARES

Nowadays, innovation is one of the most important tools that allows brands to carve their own niche in the global market. ARCH, the company who is in charge of producing and selling the Valadares brand, already employs several tools that represent their vision for the future, striving to produce ceramic items with the best possible design, practicality, and performance.

Ceramics is considered to be one of the best man-made materials, as well as the one that has the widest range of applications, even within different fields. The production involves detailed and demanding work which it is always underpinned by technical know-how, regarding both raw materials and transformation processes.

Sanitaryware is, among all the branches in ceramics, the one requiring more know-how, given the sheer size of the items as well as the highly important need for safety in their future use. Therefore, it is easy to understand why there aren't many sanitaryware producers in the world and even fewer product developers.

The Valadares brand has 95 years of experience and know-how and ARCH is now the heir to that knowledge. This allows ARCH to integrally conceive all its production, employing this knowledge from the initial modelling design to the design of the industrial equipment.

In addition, the raw materials that ARCH utilises in their production are of exceptional quality, which allows them to have a twenty-year warranty seal on their items.

NOVOS MATERIAIS QUE FAZEM A DIFERENÇA
NEW MATERIALS WHICH MAKE THE DIFFERENCE

VITREOUS CHINA
(PORCELANA SANITÁRIA)

VITREOUS CHINA
(PORCELAIN SANITARYWARE)

A ARCH produz internamente a sua Porcelana Sanitária, com recursos às melhores matérias-primas mundiais e com incorporação de componentes por si especificados e testados, que conferem vantagens características de elevada qualidade estrutural aos seus artigos e níveis de eficiência fabril e ambiental de topo.

A Porcelana Sanitária é por definição o material nobre na produção de artigos Sanitários - baixíssima porosidade e elevada resistência - contudo a deformação e retracção durante o fabrico dificultam a produção de artigos de maior dimensão.

ARCH produces their own porcelain sanitaryware, always employing the best raw materials the world can offer and incorporating their own tested and tried components. As such, they produce high-quality items with high levels of efficiency and performance, both technical and environmental. Porcelain sanitaryware is, by definition, the noble material in the production of sanitaryware items, due to the extremely low levels of porosity and high levels of resistance. However, technical issues during production - distortion and contraction - represent an obstacle in the production of bigger items.

NOVOS MATERIAIS QUE FAZEM A DIFERENÇA NEW MATERIALS WHICH MAKE THE DIFFERENCE

GRESANIT®

O Gresanit® foi concebido em 2004 e destinado à produção de artigos de grandes dimensões e como verdadeira alternativa ao Fine FireClay (Grés Cerâmico) utilizado por muitos produtores mas com problemas sérios de resistência a fendilhamento.

O Gresanit® foi imediatamente utilizado na produção de bases de chuveiro e lavatórios de grandes dimensões ou com Design evoluído e com a vantagem operacional de utilizar o mesmo processo produtivo já usado para a Porcelana Cerâmica, demonstrando desde o início características muito interessantes ao nível da resistência ao choque, peso e podendo ser trabalhado com uma gama mais alargada de produtos e aplicações, incluindo revestimentos técnicos.

Os testes físicos levados a cabo por um laboratório independente (British Ceramic Research) trouxeram-nos a certeza que este material substitui, com enormes vantagens, o Fine Fireclay disponível no mercado. Destacam-se entre elas: a resistência mecânica, a resistência ao impacto, a absorção de água e a garantia de 20 anos contra a fendilhagem.

Gresanit® was created in 2004 to solve the problem posed by the inability of porcelain sanitaryware to be used to produce big items, as well as a better alternative to Fine FireClay, which many companies employ, but that has serious crazing problems.

Gresanit® was then immediately used to produce Shower trays and large bathroom sinks as well as special design items. It has the advantage of employing the same production processes used for porcelain sanitaryware. From the start, this new material showed incredible resistance to impact, low weight, and a wide range of applications, including technical coatings.

British Ceramic Research tested the new product independently and the results showed that Gresanit® clearly trumps Fine Fireclay with added value. The most important advantages are the mechanical resistance, the resistance to impact, the water absorption rates, and the guarantee of twenty years without crazing.

NOVOS MATERIAIS QUE FAZEM A DIFERENÇA NEW MATERIALS WHICH MAKE THE DIFFERENCE

HIGHCER®

Não satisfeitos com os dois materiais já desenvolvidos, a ARCH entendeu que havia espaço para um terceiro material cerâmico da sua autoria que eliminasse a necessidade de revestimento vitrificado (vidrado), ou seja, um cerâmico em que o material possui já o acabamento pretendido pelos utilizadores. Assim foi criado o HIGHCER®, material que oferece propriedades notáveis de resistência e desempenho final e que abre um campo enorme de aplicações futuras que passam pela aplicações Sanitárias, Revestimentos técnicos, aplicações em mobiliário ou elementos de bancadas para cozinhas ou Laboratórios.

Dada a natureza deste material, é possível desenvolver um infindável nível de acabamentos e texturas, muito adequado a projectos em que o argumento estético inovador é fundamental. Entre outras aplicações deste material destacam-se as bases de chuveiro ultra finas (18-20 mm) e peças técnicas de reduzida espessura (até 3 mm) e alta resistência.

Das suas propriedades destacam-se as propriedades como antiderrapante, alta resistência mecânica, hidrorrepelencia e impermeabilidade total

Nevertheless, the Research and Development team believed that there was still demand for a third new material, one that would not require glazing and thus would have incorporated in the ceramic material the finishing required by the buyer. And thus, the team developed HIGHCER®, a new material that has incredible resistance and performance and that opens a new world of possibilities, from kitchen design to hospitals' and schools' protective coatings and even in the pharmaceutical and chemical industries.

Given its properties, this new material allows for the development of innumerable finishings and textures, making it perfect for projects requiring aesthetic innovation. The most important applications of this material are in ultra thin shower bases (18-20 mm) and extra thin technical products (under 3 mm) and high resistance. HIGHCER® is completely waterproof and hydrophobic, has high mechanical resistance and resistance to impact and is non-slippery.
